### 1. Dashboard Implementation

index.html

- **Design & Creativity:**

Adhering to the **VoltEdge Dark UI** guidelines, the dashboard utilizes a high-contrast palette (Electric Blue, Slate Gray, and Neon Green) to ensure readability and a modern "high-tech" feel.

- **Interactivity & Filters:** To provide a dynamic user experience, the following global filters were implemented:

Brand Filter: Multi-select dropdown to compare top performers like Tesla, Tata, and Audi.

BodyStyle Filter: Allows users to segment data by SUV, Sedan, or Hatchback.

PowerTrain Filter: A critical toggle between AWD, FWD, and RWD to visualize the correlation between drivetrain and energy efficiency.

## 2. Storytelling (Scenes)

The Tableau Story was designed to guide different stakeholders through specific data journeys:

- **Scene 1: Market Overview:** A macro-view using Summary Cards and Bubble Charts, highlighting the distribution of 32 global brands compared to the emerging 9 Indian brands.
- **Scene 2: Infrastructure Insight (Aarav's Story):** A geographic heatmap and stacked bar chart identifying high-demand charging zones in Noida and NDMC.
- **Scene 3: Fleet Efficiency (Meera's Story):** A Treemap analysis of battery performance (\$Wh/km\$) vs. PowerTrain type to optimize fleet operational costs.
- **Scene 4: Consumer Guide (Ravi's Story):** A "Price vs. Value" bar chart comparing the range of affordable models against premium luxury EVs.

### Story 1

## 3. Web Integration (Flask)

- **Publishing Strategy:** The workbook was successfully published to **Tableau Public**. This ensures high availability and bypasses local licensing constraints, allowing the dashboard to be accessed by any web user.
- **Tableau Public Links:**
  - Dashboard: [https://public.tableau.com/views/EVAnalyticsDashboard/Dashboard2?:language=en-US&publish=yes&:sid=&:redirect=auth&:display\\_count=n&:origin=viz\\_share\\_link](https://public.tableau.com/views/EVAnalyticsDashboard/Dashboard2?:language=en-US&publish=yes&:sid=&:redirect=auth&:display_count=n&:origin=viz_share_link)

- Story:

[https://public.tableau.com/views/EVAnalyticsStory/Story1?:language=en-US&publish=yes&:sid=&:redirect=auth&:display\\_count=n&:origin=viz\\_share\\_link](https://public.tableau.com/views/EVAnalyticsStory/Story1?:language=en-US&publish=yes&:sid=&:redirect=auth&:display_count=n&:origin=viz_share_link)

- **Flask Embedding:** The visualizations are integrated into the VoltEdge portal using the **Tableau JavaScript API (viz\_v1.js)**. This allows the UI to render PostgreSQL-derived insights directly in the browser, providing a seamless "Single Page Application" (SPA) experience.
